

Run #13

Koala's Epic opposite UNMILHOSP

Bloody Yank was able to draw the crowd in today with this epic all on flat ground. The scene started like this: 29 vigilant hares turned up knowing the yank had set his first virginal run in East Timor (and NO it wasn't Rent-A-Crowd). Newbies galore again today as we got the burst of shit from the Hare. On On down past the hospital we went. Big Cohuna and Heartstarter way out in front, this being unusual but they were there. On to the first false which threw everyone including Woofter and Viking as the calls were going out. On back towards the airfield then a sharp right and a good run down the end of the strip and on to the beach. At this stage the beach screwed most hashers even Flasha Fucker and Diak as the sand was shit to run on. On up to the mouth of the river we went, and this started to slow the FRB's down. The trail kept appearing through the swamp that we trudged through. Slops decided to do the FIRST brown eye with Hash in East Timor and the sun shone brightly. A big long run home which absolutely routed everyone but the one thought that kept the pack going was the thought of the piss at the end of the run and it was **COLD**. So not a bad run !!
